

RAINBOW CANYONS AMATEUR RADIO CLUB
CEDAR CITY, UTAH 84720

RCARC Minutes for July 9, 2013

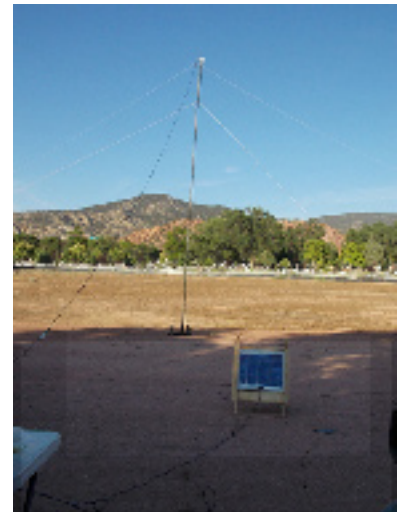

The meeting was held west of the cemetery and east of the Bicentennial Park. The purpose was to demonstrate setting up a station in the event there was a disaster that included the lost of electric grid. The disaster could include not operating from a home station and perhaps in field conditions. We had seven different station configurations including a mobile station. The demo was very informative in the display of different types of antennas, ways of setting up an antenna, power sources and desktops.

KF7YWY Cameron's truck can go almost anywhere with his 2m and 440 antennas and radio set on the tail gate plus he has built in shade.

N7KM Ken found the perfect shade for his table and station. When the solar panel was in the sun it provided plenty of power for his radio and he heard many stations his inverted VEE antenna.

WA7HHE inside his camper station with his solar cell .

Next Meeting August 13th, 7:30pm at Sheriff's Search and Rescue Building

K7ZI Dick at his hand truck station enjoying the shade.

WI7J Jim and N7TCE Merlin enjoying the shade of Dicks motorhome.

Dick has good luck with his slinky antenna.

Dick has lots of fun demonstrating his compressed air sling shot to put an antenna over a tree.

The kids were not impressed with Dick's sling shot.

Dick's solar cell charges the motorhome battery for extensive radio activity.

LEFT Jim WI7J and Dave K7VNH has an ice chest to carry and use as desktop. They used a easy to raise-vertical.

RIGHT Jim K5JCA has all he needs in his mobile. Have car will travel.

Next Meeting August 13th, 7:30pm at Sheriff's Search and Rescue Building

LEFT N7SIY Joel and WB7UMU Sylvia converted their van's back sit into an operation station. A vertical mast is attached to the open door side floor for an all band inverted Vee.

RIGHT AE7HY Bob with KB7OWE Don with all the comforts of a well shaded tent. Bob had a nice all band dipole at about 20 ft.
