 - b. Radios
 - c. Tents

3. Shifts
 - a. Day time
 - b. Night time

4. Equipment
 - a. Radios
 - b. Antennas
 - c. Computers
 - d. Tables

☺ Presidents Message ☺

Dear Fellow Hams,

It is Field Day time of the year again. The Club has decided to hold it at Three Peaks and Russ, N7BO, has agreed to head it up. It will be a great opportunity to come out and practice your HF skills and see some old friends.

Please set aside June 28-29 for this once a year Club activity. It will start at 8:00 a.m. on Saturday, with antenna set-up. We will get on air at about noon.

I would like to thank Ken Munford for his great antenna presentation. It was well attended and very informative. We shall have him back again in the near future to complete his program on antennas and feed lines. See you at Field Day!!!!

Jim Curry, N7JHC

Bring your camping gear, and come out, and be a kid again, spend the night under the stars, play on the radio.

Field day

CQ Field day CQ Field day CQ Field day. It is that time of the year, time to get out of our shack, go out into the field to brush up on our skills.

This opportunity gives us a brief chance to ponder on what if; What if there was a national emergency? Are we prepared?

Field day's purpose is to allow us in some cases to gather equipment from various resources and to put together a fully functioning station.

Some of the things that we may be in need of are:

HF Radio
Generator
Antenna
Windbreak
Writing Material
Logging

Just as some examples. I mention this mostly for the new hams. It doesn't hurt to remind the Elmer's either.

Field day can at times be a challenge. This year may just be one of those challenging years. I hear the bands are in real tough shape. If this is the case, it will be a real great time to learn under tough conditions to communicate with other stations.

Now, along with learning skills in a mock emergency setup and operations, Field day is also a chance to contest. That's right it becomes more fun knowing that you get points for all your hard work. Why, I remember one year the club ranked in the top ten in the category that we ran in.

Old men, young men, XYL's and YL's come out and partake of one of the most fulfilling Amateur Radio events of the year. Bring your camping gear and sleep over.

See Ya There N7BO
