On the third Tuesday of each month

CLUB NIGHT!!!!

Hey all you H. F. radio users! We have a special night for you!

Ken Munford will presenting to us antennas and feed lines. If you have any question on antennas or feed lines bring them, I have been to one of Ken's presentations and they are very well done.

☺ Presidents Message ☺

Hello fellow Club members,

Field day is just around the corner, so you need to be thinking about where you want to hold it. We also need to decide how many radios we will have on the air. Come to the May meeting with ideas.

Will we want to hold a dinner on Field Day as we have done in the past?

The last two years the dinners were poorly attended. What can we do to make the dinners more desirable to attend? Think about it and come with answers.

Community Emergency Response Team (CERT)

The club has a couple of CERT teams trained. We need about 48 more to cover the county. Please plan on taking the training, if your health allows, when it becomes available.

Denise Hart will schedule more training by mid summer.

We have 5 Hams trained and will need one for each team plus two at dispatch.

The training is fun and you will enjoy the classes.

Thank you Jim N7JHC
